

2026 Global Open Innovation Week - Bio Health

글로벌 오픈이노베이션 위크 - 바이오헬스

2026.09.09. (Wed) - 9.11. (Fri) WeJOINs

| 참여기업 관심분야 및 참석자

abbvie

Wendy.Tai

Search & Evaluation , Director

Stage	<ul style="list-style-type: none">• Global opportunities: Discovery to phase 3• Regional opportunities: Marketed products
Therapeutic Areas	Oncology, Immunology, Neuroscience, Eye care, Obesity, Medical aesthetics
Indication	<ul style="list-style-type: none">• Immunology: Rheumatology, gastroenterology (IBD), medical dermatology, asthma• Oncology: Solid tumors (CRC, thoracic, ovarian). Hematological Malignancies (Multiple Myeloma, Non-Hodgkin's Lymphoma, Chronic Lymphocytic Leukemia)• Neuroscience: neurodegeneration, pain (migraine, chronic/acute), psychiatry, movement disorders• Eye: retina, corneal health, glaucoma• Obesity• Medical aesthetics: neurotoxins, body contouring, fillers, skincare
Partnership	Flexible: in-licensing, co-discovery, co-development, M&A (etc.).

AMGEN

Stage	Early stage (Pre-clinical)
Therapeutic Areas	<ul style="list-style-type: none">• Oncology• Inflammation• Cardiovascular/Metabolic diseases• Rare diseases
Indication	<ul style="list-style-type: none">• Next-Generation Therapeutics Next-generation therapeutics in oncology, autoimmune diseases, and cardiometabolic disease, targeting high-value targets with modalities such as ADCs, T-cell engagers, protein degraders, and emerging genetic and molecular medicine approaches.• Artificial intelligence (AI), machine learning and data science-enabled drug discovery Approaches that help design better or novel therapeutics (biologics and small molecules) more quickly and effectively.• Novel targets and biology Approaches that enable discovery of novel targets for disease areas of Amgen's focus (oncology, inflammation, cardiovascular/metabolic, rare diseases).
Partnership	Networking

2026 Global Open Innovation Week - Bio Health

글로벌 오픈이노베이션 위크 - 바이오헬스

2026.09.09. (Wed) - 9.11. (Fri) WeJOINs

| 참여기업 관심분야 및 참석자

	Kendra Rose, BD&AM Deepa Talpade, Senior Vice President and Head of BD&L
Stage	No Specific stage
Therapeutic Areas	<ul style="list-style-type: none">• Oncology• Cardiovascular• Immunology• Cell & gene
Indication	<ul style="list-style-type: none">• GI/GU Solid Cancer
Partnership	-

	Evan Golberg Jing Qing 정재홍, Head of BD
Stage	Discovery through Commercial
Therapeutic Areas	Oncology
Indication	<ul style="list-style-type: none">• Differentiated assets in hematology-oncology and solid tumors;• I&I assets in diseases with high unmet needs;• Innovative technologies and clinical-stage assets requiring support in process design, manufacturing, and regulatory strategy
Partnership	Licensing, Co-development, Collaboration

글로벌 오픈이노베이션 위크 - 바이오헬스

2026.09.09. (Wed) - 9.11. (Fri) WeJOINs

| 참여기업 관심분야 및 참석자

		Liyuan Yang Vice president China Head of Business Development
Stage	Not limited	
Therapeutic Areas	<ul style="list-style-type: none">• Solid Tumors Hematology• Cell Therapy• Immunology• Cardiovascular• Neuroscience• Translational Medicine• Research & Enabling Technologies	
Indication	<ul style="list-style-type: none">• Solid Tumors• Hematology• Cell therapy• Immunology• Cardiovascular	
Partnership	Not limited	

		Yashiro Koji Director Pacific Business Development&Licensing
Stage	Early stage	
Therapeutic Areas	<ul style="list-style-type: none">• Oncology• Cardiovascular & Respiratory• Atherosclerosis & Metabolism• Infectious Diseases & Vaccines• Immunology• Neuroscience & Ophthalmology	
Indication	<ul style="list-style-type: none">• Oncology: Cancer, Solid tumors• Cardiovascular & Respiratory: Cardiovascular diseases, Respiratory diseases• Atherosclerosis & Metabolism: Atherosclerosis, Metabolic diseases• Infectious Diseases & Vaccines: Infectious diseases, Vaccines• Immunology: Immune-mediated diseases, inflammatory diseases• Neuroscience & Ophthalmology: Neurological diseases, Ophthalmic diseases	
Partnership	Collaboration

| 참여기업 관심분야 및 참석자

NOVO
holdings

Kim Png
Partner

Stage	Seed to growth stage
Therapeutic Areas	Broad healthcare and life sciences, with a focus on innovative therapeutics, medical technologies and enabling technologies.
Areas of Interest	Companies developing differentiated technologies and products with global potential, including therapeutics, platform technologies, AI-enabled drug discovery, diagnostics and other healthcare innovations.
Partnership	Venture investment, company creation, strategic investment and collaborations.

Jenny Yang
Head of External Innovation Asia Pacific
Calvin Chen
Associate Director of External Innovation Asia Pacific

Stage	All stages (discovery to phase 3)
Therapeutic Areas	Diabetes, obesity, other chronic cardiometabolic diseases, rare disease and enabling technologies
Indication	<ul style="list-style-type: none">• Diabetes (Type 1 & 2 diabetes), obesity, diabetes and obesity related comorbidities (chronic heart failure, atherosclerosis, chronic kidney disease, MASH)• enabling technologies (drug/target discovery platform, tissue specific delivery platform, sustained release platform, oral peptide delivery platforms, etc.)
Partnership	Flexible: research collaboration, co-development, licensing deal, acquisition, etc.

| 참여기업 관심분야 및 참석자

Fujimura ken

Director

Center for External Innovation Japan/APAC

Stage	All Stages
Therapeutic Areas	Oncology, Neuroscience, Gastroenterology and Inflammation diseases
Indication	<ul style="list-style-type: none">• Oncology: Lung, Colorectal and Pancreatic cancer, R/R AML• Neuroscience: Alzheimer's disease, ALS• GI and Inflammation: Systemic sclerosis, Fibrostenotic Crohn's disease, Atopic dermatitis
Partnership	In-licensing, Research collaboration

2026 Global Open Innovation Week - Bio Health

글로벌 오픈이노베이션 위크 - 바이오헬스

2026.09.09. (Wed) - 9.11. (Fri) WeJOINS

| 참여기업 관심분야 및 참석자

문현우

R&I Team Principal Researcher

Stage	<ul style="list-style-type: none">• IND enabling ~ Phase 1
Therapeutic Areas	<ul style="list-style-type: none">• Small Molecules (incl. TPD)• Antibody Therapeutics(Mono/Multispecific) etc.
Indication	<ul style="list-style-type: none">• Oncology• Autoimmune diseases• Neurodegenerative diseases, etc
Partnership	Licensing <ul style="list-style-type: none">• Collaboration• Investment

원종헌

Head of Business Development

Stage	Pre-clinical to IND enabling stage assets
Therapeutic Areas	Solid Tumor
Indication	RCC, HNSCC, NSCL, Breast Cancer, Ovarian Cancer
Partnership	Flexible on the Partnership model (Co-development, Licensing and etc)

| 참여기업 관심분야 및 참석자

이수민
Director
Research Center

Stage	Discovery to Preclinical
Therapeutic Areas	<ul style="list-style-type: none">• Oncology• Inflammation & Immunology• Metabolic Disease• Obesity• Non-Opioid Pain
Indication	<ul style="list-style-type: none">• Oncology: Lung cancer, Ovarian cancer• Inflammation & Immunology: Chronic urticaria, Atopic dermatitis, Asthma• Metabolic Diseases: Obesity and related metabolic disorders• Pain: Non-opioid pain management• Modality: Small molecules (Novel targets); TPDs (Undruggable targets); ADCs (Novel antibodies and/or novel/differentiated payloads);• Platform: Differentiated AI-driven Drug Discovery Platform
Partnership	<ul style="list-style-type: none">• Collaborative Research• Co-development• Licensing

Stage	Preclinical, Pre GLP-Tox 및 PCC Nominated
Therapeutic Areas	CNS
Indication	AD, PD, ALS, Huntington, MS, Epileps
Partnership	R&D Collaboration 및 Co - Development

GE HealthCare

이대욱

Chief Strategy, Marketing,
Commercial Operations Officer

Stage	Not limited
Target Clinical Areas	<ul style="list-style-type: none">• Cardiology• Neurology• Oncology
Clinical Use Cases /Indication	MRI/CT/Ultrasound/Patient Monitor/Digital Solutions
Partnership	Collaboration

SIEMENS
Healthineers

Stage	<ul style="list-style-type: none">• Late-stage-technology integration• platform-based collaboration
Therapeutic Areas	<ul style="list-style-type: none">• Precision diagnostics & imaging across major disease areas• Neurology/Stroke• Cardiovascular• Oncology
Indication	<ul style="list-style-type: none">• AI-enabled imaging for early detection, diagnosis, and clinical decision support Digital and AI solutions for disease management and workflow efficiency Imaging-based screening and risk prediction (e.g., cancer, cardiovascular, osteoporosis)• Image guided solutions & Surgical Robotics
Partnership	<ul style="list-style-type: none">• Co-development• Platform integration• Global commercialization
